EXPERIENCE

Cogknit Semantics Pvt Ltd, Bangalore — UI Developer Jan 2020 - PRESENT

Tata Consultancy and Services(TCS), Bangalore — System Engineer Jan 2017 - Dec 2019

EDUCATION

Federal Institute of Science and Technology, Angamaly — BTech in Electronics and Communication, MG University

Aug 2012 - March 2016

PROJECTS

ICOG — Cogknit Semantics Pvt Ltd

ICOG is an online learning platform which provides both enterprise and saas based solutions along with a retail version as well. The system works using a competency framework which allows companies to train and assess employees using contents, assessments and learning paths.

There are views for uploading, curating and viewing text, audio and video based contents which then can be bundled into learning paths along with assessments and case studies along with dashboards to view the progress of each user.

My role as a ui developer was to first convert the entire application ui from Backbone js to react by using redux to state management. We later changed the entire ui to a modern look and created a SAAS version as well which we can deploy for small scale businesses. Main challenges included dividing the work so as to meet the deadlines and also reviewing and merging others code.

As part of this there was constant interaction and brainstorming with backend and design teams to find best possible solutions according to the business logics.

Process Mining — TCS (Hindustan Unilever)

Objective of this project was to identify the number of days it took for each step of a

TECHNICAL SKILLS

Web Technologies :
